10 litre expansion tank included as standard	10 litre expansion tank included as standard
3/4" BSPP Connections	3/4" BSPP Connections

Fully portable electric boilers that deliver up to 36kW, these versatile hot water systems are equally at home as part of stand alone heating systems, or as back up during repairs or maintenance to a fixed system.

Great for underfloor heating systems and ideal for curing screed, where the simple to use touch screen allows users to easily tailor them to any application: Just set the temperatures and timeframe and let the unit scale up and down automatically as required. The controller can then store up to six different programs for future reference.

Housed in an all steel case these versatile boilers are built to withstand the rigours of regular site use and transportation and come ready to plug and play.

Also featuring a full suite of safety devises such as high and low pressure protection, over temperature protection and automatic air bleed valves the WB range also boast our two year warranty.

- ✓ Up to 36kW of fully portable heat
- ✓ Full steel construction
- ✓ Automatically scales up and down water temperature for screed drying; no need for site visits
- ✓ Easy to use touch screen to create and store programs
- ✓ Stores up to six programs
- ✓ Fully serviceable
- ✓ UK built
- ✓ Two year warranty
